WOODBINE AWARDS CONTRACT IN THE AMOUNT OF \$321,111 FOR TAXIWAY B REHABILITATION – CONSTRUCTION, PHASE III

Woodbine—Mayor William Pikolycky is pleased to announce that the Borough of Woodbine, at its May 6 Council meeting, awarded a contract in the amount of \$321,111.00 to South State, Inc for Taxiway B Rehabilitation – Construction, Phase III (West End).

Taxiway B has not been rehabilitated since the 1980s and the pavement has exceeded its life expectancy. Due to condition of this existing taxiway in where, severe major cracks have been observed, a full mill and overlay of the pavement will be designed. The project proposes to rehabilitate approximately 3,100 x 35 feet of Taxiway B which is parallel to Runway 13-31. The project will include taxiway markings, minor and major crack repairs, and repair solutions for asphalt heaving repairs. The taxiway edge lighting will not be a part of this project however it will be designed at a later phase and is a part of the Taxiway B Rehabilitation project plan.

“This is phase 3 of a multi-phase project consisting of a total of 4 phases, which totals approximately \$1,084,000 to date.” noted Mayor Pikolycky “Funding is being provided by both the Federal Aviation Administration and New Jersey Department of Transportation, Division of Aeronautics.”

“This rehabilitation work is one of the many continuing project plans to provide a safer environment for the flying community as we continue to address the future of Woodbine Municipal Airport,” noted Mayor Pikolycky. “We plan towards the continuing improvement of our airport to make it a preferred destination for visitors/businesses to this area. This comes at a good time since we are experiencing new private sector interest and investment in our airport with the Borough benefiting economically from it.”
