SOUTH JERSEY GAS EXTENDS GAS MAIN FURTHER INTO WOODBINE

Woodbine—Mayor William Pikolycky is pleased to announce that South Jersey Gas will be extending its service from Route 610 down Route 550 to the Woodbine Developmental Center beginning April 15.

“This phase will be followed by a public interest campaign by South Jersey Gas with a forum to survey anyone who might be desirable of becoming a customer of their service for planning of future expansions into the community. This will put us in a stronger position with our Airport Gateway Business Park development,” noted Mayor Pikolycky. “This extension is wonderful news for the home owners and businesses in Woodbine.”

The Woodbine Developmental Center will now be operating on 70% methane and 30% natural gas, which will eventually replace oil.

If any businesses are interested in additional information about South Jersey Gas, contact Dan Carter, Manager Major Accounts, at 609-561-9000.
