### **WOODBINE SCHOOL RECEIVES SURPLUS US SENATE COMPUTERS**

**Woodbine**—Mayor William Pikolycky is pleased to announce the office of U.S. Senator Robert Menendez has announced the receipt by Woodbine Elementary School of five computers for classroom use. These computers were made available through the “Computers for Schools” program run by the United States Senate Sergeant at Arms which channels surplus computers from the Senate to classrooms across the country. Each year, the Senate Sergeant at Arms office allows Senators, based on seniority, to donate five computers each to five public schools, for a total of 25 computers.

“We have worked closely with Senator Menendez on many concerns for the welfare of both our school district and the Borough generally, and we thank him for his selection of Woodbine as one of the five municipalities in the state to participate in this program,” noted Mayor Pikolycky. “Senator Menendez has been fully supportive of our efforts to assist the school district, in particular our Community School concept, by any means possible during these trying financial times.”
